Artist: Teri Danz Band
Album Name: Gardens in the Concrete
Label: Bleach Records
Genre: Folk/Acoustic Rock
Released: 2002
Website: www.teridanz.com
Reviewed by: [Erik Beyer](#)

Out of LA is a female artist, but not just any female artist. Teri Danz has been out there doing the performance thing for a long time and continues to rock her songs. In my CD player (computer) is her 2002 release, Gardens in the Concrete, 12-tracks of her heart felt music. Taking acoustic music and expanding the styles and genre range from straight folk to rock, but all with a flavor of her own. Her voice rides on top of the music. Her unique sound will stand out in such a good way. Frankly, it's nice to hear this voice.

With her share of recognition as an independent artist, Teri continues to plug away at getting her name out there. She has received some supporting and positive words from even Ian Copeland, who also owns the Backstage Cafe in Beverly Hills, about her live performances. There is no question that this album performance is delivered well on stage. The tight sound, solid mix, and continued drive and energy makes this album a treat to listen to.

Check out her site and you'll get to know her and her music.
